Int. J. Bio-Medical Computing, 20 (1987) 305–308
Elsevier Scientific Publishers Ireland Ltd.

INTERNATIONAL JOURNAL OF BIO-MEDICAL COMPUTING

SUBJECT INDEX

Volume 20 (1987)

Alienor transformation, compartmental models, identification, optimisation, 27
Allosteric enzymes, enzyme kinetics, 163
Alveolar compartment, diffusion, quaternary gas mixtures, blood compartment, helium effect, 97
AR model, syntactic analysis, Kalman filter, spectral analysis, epilepsy, multichannel EEG, structural analysis, 135
Artificial intelligence, expert systems, computer diagnosis, models, 123
Autonomic nervous system, ECG signal processing, heart rate variability, cardiovascular diagnosis, time series analysis, autoregressive modeling, 51
Autoregressive modeling, ECG signal processing, heart rate variability, cardiovascular diagnosis, sutonomic nervous system, time series analysis, 51
Autoagressive model, EEG, segmentation, model order, 41
Axial diffusion, gas exchange, pulmonary circulation, 191

Bayes' theorem, expert systems, probability, computer diagnosis, 71
Bibliographic references, information retrieval, microcomputer, 107
Biological, Gompertz, model, foundation, 35
Bio-medical computing, digital signals, eye movements, nystagmus, 253
Blood compartment, diffusion, quaternary gas mixtures, alveolar compartment, helium effect, 97

Cardiovascular diagnosis, ECG signal processing, heart rate variability, autonomic nervous system, time series analysis, autoregressive modeling, 51
Cast model, resistance, pressure, flow, upper airways, central airways, 211
Cellular, digital, microscopy, subcellular, features, 79
Central airways, resistance, pressure, flow, upper airways, cast model, 211
Chronotopocardiography, orthogonal electrocardiograms, orthogonal vectorcardiograms, 275
Cochlea implants, light computing, laboratory computers, heart pacemakers, 1
Compartmental models, identification, alienor transformation, optimisation, 27
–, mathematical modelling, global optimisation, reduction of variables, 21
Computer applications in medicine, database management systems, signal and image analysis, medical decision making, 239
Computer diagnosis, expert systems, artificial intelligence, models, 123
–, –, Bayes' theorem, probability, 71
Computer graphics, three-dimensional reconstruction, serial section, stereotaxis, neuroanatomy, continuous tone, modular programming, solid model, 289
Computer, information system, portable data collector, health care, Department of Medicine, 175
Computer surveillance (hospital infections), molecular computers, 157
Continuous tone, three-dimensional reconstruction, computer graphics, serial section, stereotaxis, neuroanatomy, modular programming, solid model, 289

Correlation dimension, EEG, phase space, embedding dimension, 283
Curve fitting, linear regression, linear least squares, 9

Database management systems, signal and image analysis, computer applications in medicine, medical decision making, 239
Data reduction, microprocessors, storage, minicomputer, immunoassay, 181
Department of Medicine, computer, information system, portable data collector, health care, 175
Diffusion, quaternary gas mixtures, alveolar compartment, blood compartment, helium effect, 97
Digital, microscopy, cellular, subcellular, features, 79
Digital signals, bio-medical computing, eye movements, nystagmus, 253
Distortion, EEG, filter, transient, 87

ECG signal processing, heart rate variability, cardiovascular diagnosis, autonomic nervous system, time series analysis, autoregressive modeling, 51
EEG, autogressive model, segmentation, model order, 41
–, filter, transient, distortion, 87
–, phase space, embedding dimension, correlation dimension, 283
Embedding dimension, EEG, phase space, correlation dimension, 283
Enzyme kinetics, allosteric enzymes, 163
Epilepsy, syntactic analysis, Kalman filter, spectral analysis, multi-channel EEG, AR model, structural analysis, 135
Expert systems, Bayes' theorem, probability, computer diagnosis, 71
–, computer diagnosis, artificial intelligence, models, 123
Eye movements, bio-medical computing, digital signals, nystagmus, 253

Feature, digital, microscopy, cellular, subcellar, 79
Filter, EEG, transient, distortion, 87
Flow, resistance, pressure, upper airways, central airways, cast model, 211
Foundation, Gompertz, model, biological, 35

Gas exchange, pulmonary circulation, axial diffusion, 191
Global optimisation, mathematical modelling, reduction of variables, compartmental models, 21
Gompertz, model, biological, foundation, 35

Health care, computer, information system, partable data collector, Department of Medicine, 175
Heart pacemakers, light computing, cochlea implants, laboratory computers, 1
Heart rate variability, ECG signal processing, cardiovascular diagnosis, autonomic nervous system, time series analysis, autoregressive modeling, 51
Helium effect, diffusion, quaternary gas mixtures, alveolar compartment, blood compartment, 97

Identification, compartmental models, alienor transformation, optimisation, 27
Immunoassay, microprocessors, storage, minicomputer, data reduction, 181
Information retrieval, bibliographic references, microcomputer, 107
Information system, computer, portable data collector, health care, Department of Medicine, 175

Kalman filter, syntactic analysis, spectral analysis, epilepsy, multi-channel EEG, AR model, structural analysis, 135

Laboratory computers, light computing, cochlea implants, heart pacemakers, 1
Light computing, cochlea implants, laboratory computers, heart pacemakers, 1
Linear least squares, curve fitting, linear regression, 9
Linear regression, curve fitting, linear least squares, 9
Logistic equation, lymphocyte proliferation, thymosin, mitogens, 265
Lymphocyte proliferation, thymosin, mitogens, logistic equation, 265

Mathematical modelling, global optimisation, reduction of variables, compartmental models, 21

Medical decision making, database management systems, signal and image analysis, computer applications in medicine, 239
Microcomputer, bibliographic references, information retrieval, 107
Microprocessors, storage, minicomputer, immunoassay, data reduction, 181
Microscopy, digital, cellular, subcellular, features, 79
Mimicking human intelligence, sensory devices, respiratory sounds spectra, spectroscopic data computerization, 233
Minicomputer, microprocessors, storage, immunoassay, data reduction, 181
Mitogens, lymphocyte proliferation, thymosin, logistic equation, 265
Models, expert systems, computer diagnosis, artificial intelligence, 123
Model, Gompertz, biological, foundation, 35
Model order, EEG, autogressive model, segmentation, 41
Modular programming, three-dimensional reconstruction, computer graphics, serial section, stereotaxis, neuroanatomy, continuous tone, solid model, 289
Molecular computers, computer surveillance (hospital infections), 157
Multi-channel EEG, syntactic analysis, Kalman filter, spectral analysis, epilepsy, AR model, structural analysis, 135

Neuroanatomy, three-dimensional reconstruction, computer graphics, serial section, stereotaxis, continuous tone, modular programming, solid model, 289
Nystagmus, bio-medical computing, digital signals, eye movements, 253

Optimisation, compartmental models, identification, alienor transformation, 27
Orthogonal electrocardiograms, chronotopocardiograms, orthogonal vectorcardiograms, 275
Orthogonal vectorcardiograms, chronotopocardiograms, orthogonal electrocardiograms, 275

Phase space, EEG, embedding dimension, correlation dimension, 283
Portable data collector, computer, information system, health care, Department of Medicine, 175
Pressure, resistance, flow, upper airways, central airways, cast model, 211
Probability, expert systems, Bayes' theorem, computer diagnosis, 71
Pulmonary circulation, gas exchange, axial diffusion, 191

Quaternary gas mixtures, diffusion, alveolar compartment, blood compartment, helium effect, 97

Reduction of variables, mathematical modelling, global optimisation, compartmental models, 21
Resistance, pressure, flow, upper airways, central airways, cast model, 211
Respiratory sounds spectra, sensory devices, mimicking human intelligence, spectroscopic data computerization, 233

Segmentation, EEG, autoaggressive model, model order, 41
Sensory devices, respiratory sounds spectra, mimicking human intelligence, spectroscopic data computerization, 233
Serial section, three-dimensional reconstruction, computer graphics, stereotaxis, neuroanatomy, continuous tone, modular programming, solid model, 289
Signal and image analysis, database management systems, computer applications in medicine, medical decision making, 239
Solid model, three-dimensional reconstruction, computer graphics, serial section, stereotaxis, neuroanatomy, continuous tone, modular programming, 289
Spectral analysis, syntactic analysis, Kalman filter, epilepsy, multi-channel EEG, AR model, structural analysis, 135
Spectroscopic data computerization, sensory devices, respiratory sounds spectra, mimicking human intelligence, 233
Stereotaxis, three-dimensional reconstruction, computer graphics, serial action, neuroanatomy, continuous tone, modular programming, solid model, 289

Storage, microprocessors, minicomputer, immunoassay, data reduction, 181
Structural analysis, syntactic analysis, Kalman filter, spectral analysis, epilepsy, multi-channel EEG, AR model, 135
Subcellular, digital, microscopy, cellular, features, 79
Syntactic analysis, Kalman filter, spectral analysis, epilepsy, multi-channel EEG, AR model, structural analysis, 135

Three-dimensional reconstruction, computer graphics, serial section, stereotaxis, neuroanatomy, continuous tone, modular programming, solid model, 289
Thymosin, lymphocyte proliferation, mitogens, logistic equation, 265
Time series analysis, ECG signal processing, heart rate variability, cardiovascular diagnosis, autonomic nervous system, autoregressive modeling, 51
Transient, EEG, filter, distortion, 87

Upper airways, resistance, pressure, flow, central airways, cast model, 211
